davv bca question papers

September 2012
Bachelor of Computer Application (BCA) Examination
II Semester

Problem Solving & Programming Through C - II

Time : 3 Hours]   [Max. Marks : 50

Note - *Attempt all five questions. Symbols have their usual meanings. All questions carry equal marks.*

1. (a) What do you mean by actual and formal arguments ? Write a program to show concepts of call by value and call by reference.
   (b) Differentiate between function and macro giving example.

   OR

   (a) Write a program to enter 5 digit number and add each individual digit and print result.
   (b) Explain types of recursion with example.

2. (a) Write a program to read 10 numbers from user in 1 dimension array 'A' and 'B'. Add numbers of both array A and B and store in 1 dimension array C. Display all 1 dimension arrays.
   (b) What is pointer to function and function returning pointer? Explain each concept *by* example.

   OR

   (a) What are Dynamic memory allocation functions in C ? Explain each one in brief
   (b) What is Structure ? How is it different from Union ?

3. (a) Differentiate text and binary file.
   (b) Write a program to read a file and print the following information :
      (i) How many number of character ?
      (ii) How many number of words ?
      (iii) How many number of lines ?

   OR

   (a) What is Command Line Argument Concept ? What is the need of it ?
   (b) Describe various file opening modes.

4. (a) What do you mean by Video display modes and resolution ?
   (b) Explain different types of video adapter in graphics mode.

   OR

(a) What do you mean by Video Memory ?

(b) Describe various types of monitors with their advantages and disadvantages.

5. (a) Write a program to create rectangle with yellow colour.

(b) Explain the process to create lines and bars in graphics programming.

OR

(a) What do you mean by filling regular and non-regular shapes of graphics ?

(b) Write the method to output, text in different colours and graphical formats.
